

# External transfer of I/Q data measured by the signal analyzer

◇I/Q data measured can be easily transferred by the signal analyzer.

## \*Application\*

### ■Connection schematic diagram

## \*Solution\*

- Set the signal analyzer to the real time mode.
- Select the display of the time domain in the main analysis, and then run the Data Acquisition.
- The I/Q data of up to 16,383 frames can be saved.

### ■Transfer from the signal analyzer to the USB flash

All or any part of I/Q data measured can be transferred to the USB flash drive.

### ■Transfer from the signal analyzer to

By using the PC software [MAS500], I/Q data measured can be easily transferred to the PC.

Measurement example of I/Q data (I/Q vs time)

## \*System constitution\*

Signal analyzer[MSA538]	×1
Lithium-ion battery [MB400]	×1
USB cable [MI400]	×1
PC software [MAS500]	×1
