IFM20B (I/F Module 20B)

Resolve LAN/USB Port Shortages Instantly

The High-Performance I/F Module Designed for Real-World Needs.
High-end Compatible Model of IFM2/IFM7

■ Experience superior expansion

The IFM20B is a high-end model that integrates and enhances the features of the existing IFM2 and IFM7.

With two LAN ports and two USB ports, it is the perfect solution for users needing more connectivity without compromising shielding performance.

Key Evolutionary Points

■ Enhanced Connectivity

Equipped with two LAN and two USB ports to resolve the port shortages of the existing IFM7.

■ Next-Generation Speed

Features Cat 6A equivalent LAN and USB 3.1 Gen1 for high-speed data transmission.

■ Advanced Power Delivery

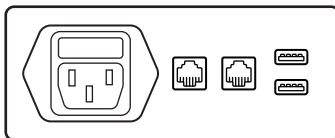

Supports PoE++ to power high-performance devices.

■ Reliable Shielding

Allows for video and data monitoring without compromising the shielding characteristics (typ) of the box.
