

A passive loop antenna suitable for the measurement of low frequency with 40 cm diameter

LED light radiation noise measurement is available for each axis of XYZ.

Radiation noise measurement of LED lighting

Specifications

Frequency range	50kHz ~ 33MHz
Connector	N(P) connector
Impedance	50 Ω
Dimensions	Outside:420mm, Inside diameter:320mm, Thickness:13mm
Weight	1.2kg

Stand for MAN120
